

**Program of the scientific symposium:
Translational Approaches to
Autoinflammatory Diseases**

Thursday, 15th of May 2014

- 11.00-12.30 Meeting of German AID-Net partners
- 13.00-14.00 Welcome / Snacks
- 14.00-15.30 Hereditary fever syndromes part I
Jasmin Kümmerle-Deschner – State of the art: CAPS
Juan I. Aróstegui – Clinical consequences of somatic NLRP3 mosaicism
Anna Simon – New aspects on hyper-IgD-syndrome
- 15.30 Coffee break
- 16.00-17.30 The spectrum of autoinflammatory diseases (AID) part I
Michael Hofer – PFAPA: What is new?
Annette Jansson – NBO as a remaining challenge
Isabelle Touitou – Overview of recently described AID
- 18.30 Welcome reception

Friday, 16th of May 2014

- 9.00-10.30 Regulation of inflammation: Is there a link to autoinflammation?
Dominik Hartl – Suppressor cells and regulators of innate immunity
Angela Roesen-Wolff – Regulation of caspases
Raphaela Goldbach-Mansky – Interferon-related pathway in autoinflammation
- 10.30 Coffee Break
- 11.00-12.30 Systemic juvenile idiopathic arthritis (SJIA)
Raffaele Strippoli – Cytokines: IL-1 drives IL-6, or is it vice versa?
Tim Beukelman – The recommended management of SJIA
Karin Beutel – Hemophagocytosis or macrophage activation syndrome
- 13.00 Lunch Break
- 14.00-15.30 Hereditary fever syndromes part II
Tilman Kallinich – News on FMF pathophysiology and management
Veronique Hentgen – Heterozygeous FMF
Marco Gattorno – TRAPS: Current concepts of pathogenesis and therapy
- 15.30 Coffee break
- 16.00-17.30 The spectrum of autoinflammatory diseases (AID) part II
Seza Ozen – State of the art: Behcet's disease
Elke Lainka – AID in Germany
Maria Miranda-Garcia – Biomarkers for autoinflammation?
- 18.30 End of scientific symposium with guided "microbrewery tour" and dinner
